Features and Modules

WHY SMART BUSINESS 24?

Benefits of Smart Business 24

Easy to Use

Over a hundred Businesses in Bangladesh have already chosen our software because our system is designed by keeping your needs in mind. The Smart Business 24 is a customizable and scalable solution that can be customized based on your unique operational needs. Also, this amazing AI-powered business management system website can be designed easily by users. Just drag and drop to customize the website as per your needs. The all-in-one dashboard allows you to access all your information from one single dashboard. What's more, you will be able to access it wherever you are since this is a cloud-based solution.

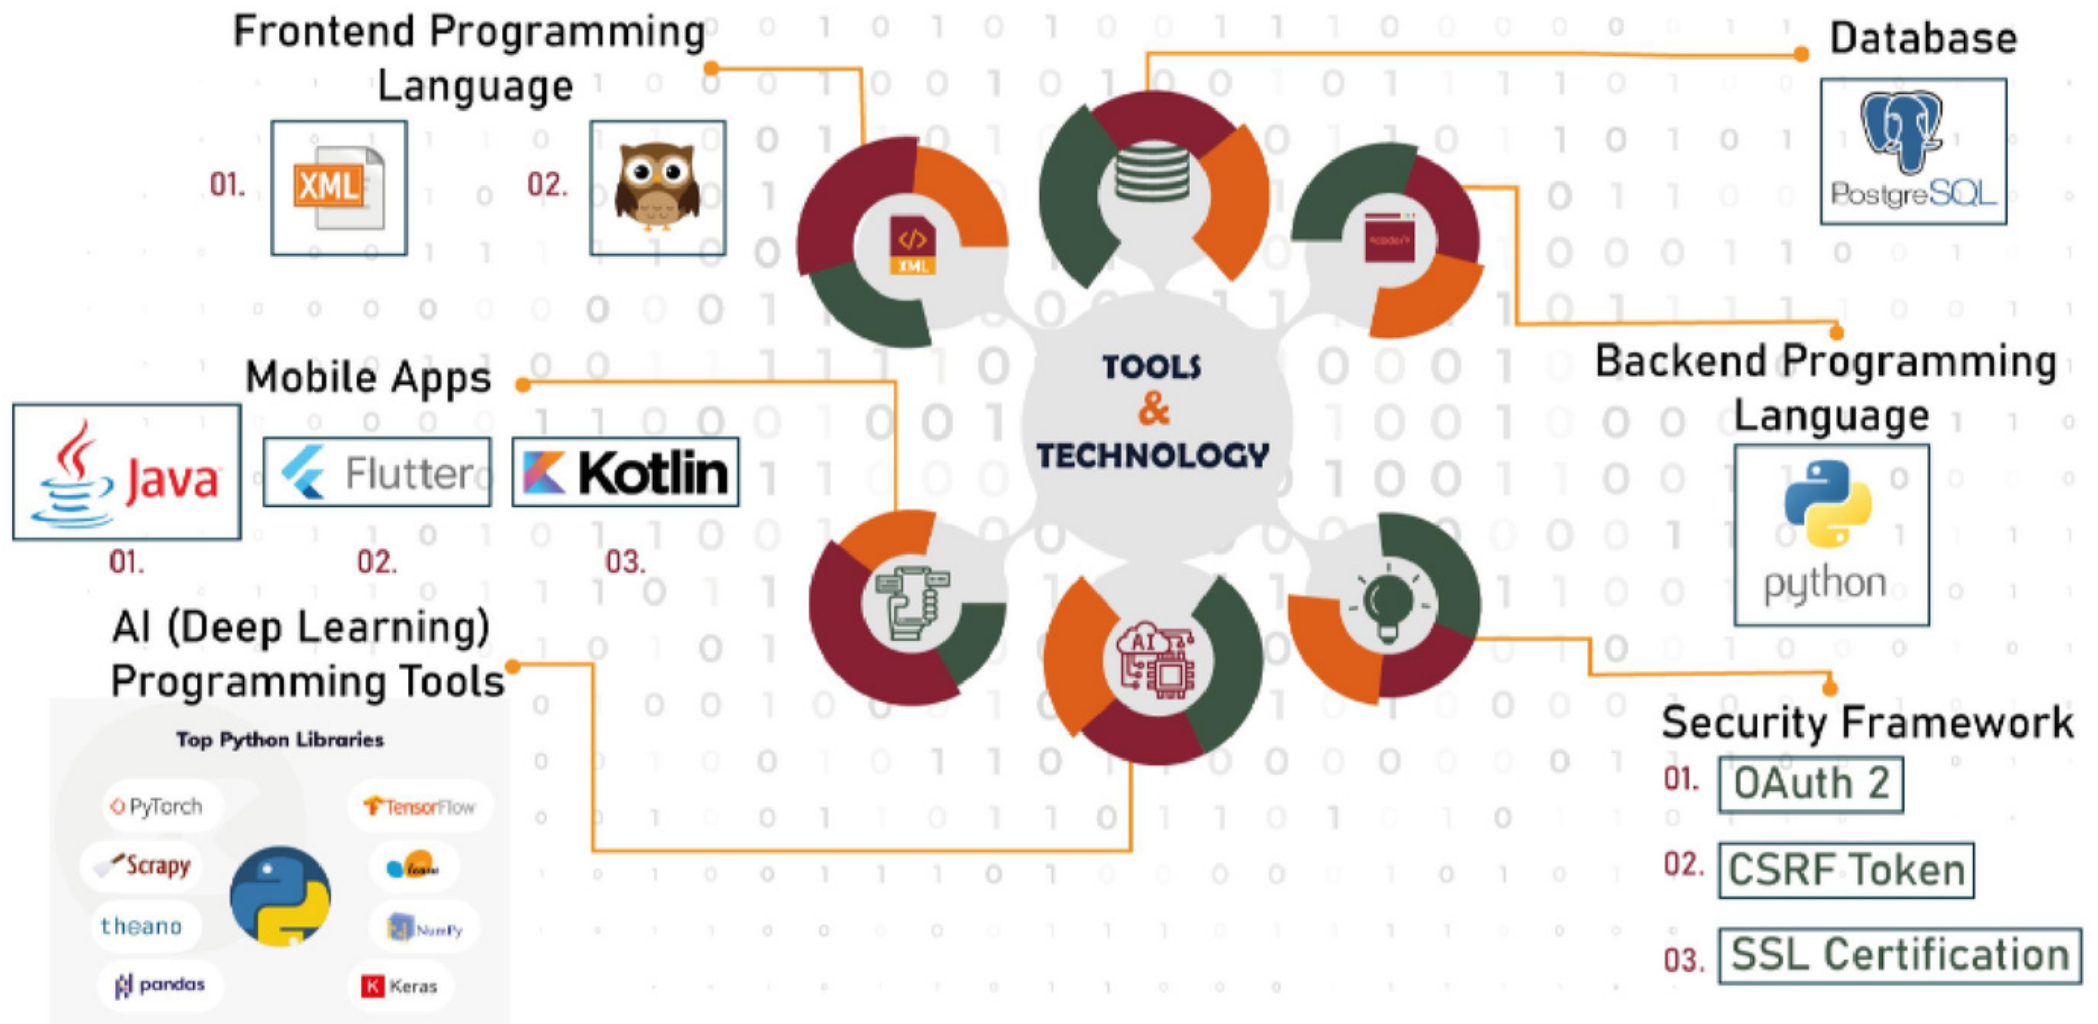

No Hardware Investment

As said before, investing in hardware is so overwhelming when it comes to using a management solution. Unlike other software on the market, the Smart Hospital does not require any hardware infrastructure. You may be wondering who will fix the issues of the system then? Well, we do it all for you, including allowing you to use our cloud server for storing sensitive data that is valuable to you.

Support/ Training

We provide comprehensive training to our clients so you can use our system without any difficulty. Also, our custom software development specialists will be there for you 24/7 to solve any type of problem or to customize the system as per your business needs. With our expert help, you will have complete peace of mind and be able to fully focus on your business since we will handle the technical issues as soon as they arise.

OUR USED TECHNOLOGIES

Our Offered Modules

SaaS Model

SaaS offers an interesting alternative to standard software installation for the traditional business environment. It is like a subscription service where the user just installs the application files which remain available over a network for use.

For More Information

Please Visit

erp.daffodil.family/shop

Benefits of SaaS

- ✓ Cost effective
- ✓ Pay Per Use.
- ✓ Rapid Deployment
- ✓ Enhanced Teamwork
- ✓ Reduced time to benefit
- ✓ Lower costs
- ✓ New releases or upgrades
- ✓ Easy to use

Licensed Model

On the other hand, a License is an authorization that grants one user the right to use a software package. It may grant the user the right to install the software on only one machine, or it may authorize installation on any number of machines as long as that same licensee is the only user.
